# Dear Friends:

We are happy to present our 1947 Seed Catalog and hope you may find it interesting and informative.

In our presentation we have endeavored to describe the various varieties concisely, in a manner which may be helpful in your choice for your particular needs. All varieties of seeds which we offer are, in our opinion, well adapted for your garden.

The fact that we ourselves grow a very large proportion of the seeds we sell is a distinct advantage to you. As producers, we know what we are selling because we have seen it growing. We know what our customers want and need because we have talked with them of their requirements and have inspected many gardens to ascertain proper varieties to plant in various locations. Our breeding and selection work has been directed toward growing vegetables which will produce seed which in turn produces second generation crops exactly like its parents. This emphasis on proven quality means better types, bigger yields and earlier returns.

Each year we receive many letters from our customers, some advising us of the success which they have enjoyed with our seed, others requesting advice as to their garden problems, or of a personal nature. We welcome friendly letters as it is our desire to realize the satisfaction of enjoying the friendship of all our neighbors.

We hope to have the privilege of serving you again this season. May your garden be bountiful and all go well with you.

## HART'S LAWN GRASS SEEDS New! Convenient!

**5 QUALITY BRANDS—BOXES IN 1, 2 and 5 LBS., ALSO AVAILABLE IN 10, 25, 50 and 100 LB. BAGS**

This is the modern way to buy lawn seed because you can buy a dependable brand with the quality and contents clearly labeled. You'll like the box because it's easier to handle, and protects unused seed better. We offer these 5 quality brands boxed.

**HART'S STANDISH PARK (GOLD SEAL)** meets the exacting requirements of the State of Connecticut and is fully qualified to bear the State Seal of "Highest Quality." The basic turf grass seeds used are as nearly 100% pure as the most modern cleaning machinery can make them. The lawn resulting from this seed will present an ideal appearance.

**HART'S BLUE SEAL** bears the "High Quality" Seal of the State of Connecticut, and produces dense, thick turf with a thrifty root system which insures long life and resistance to rough usage. While it does not meet the exacting standards of **Gold Seal**, it produces a turf similar to that fine blend. For best results, sow in Spring or Fall.

**HART'S RED SEAL** is rated "Good Quality" under State specifications and contains a higher percentage of quick growing grasses than the other Seal Blends, although the permanent grasses are in somewhat smaller supply. Highly valuable for late Spring or Summer seeding. Produces excellent turf under adverse conditions.

**HART'S ELM TREE LAWN SEED** is named for the famous Wethersfield Elm. The ingredients are similar to those of the State Seal blends but they are not as highly refined. It is rapid growing yet permanent and produces a rich, velvety turf. May be sown at any season, under all conditions.

**HART'S SHADY PLACE** is a very superior blend of hardy, deep-rooted grasses designed for permanent turf

on lawns which have more shade than sun. Will give good results under trees or on the north side of buildings.

We also offer

**EVERGREEN.** Satisfactory for the average lawn, but simply does not contain as large a percentage of the finer bladed, more desirable grasses, or is the purity quite as high as in the State Seal mixtures.

**POOR, or SANDY SOILS BLEND** will thrive on soils of that type.

**TERRACE SOD** is useful on embankments and steep slopes.

**DEEP SHADE** is for use in densely shaded locations only.

**SPECIAL BENT AND SPLENDOR (GOLD SEAL)** are adapted for spots where an ultra-fine turf is desired.

Extract from letter:

West Acton School  
Noel Road  
Acton, W. 3., England

"I was the lucky recipient last Spring of a gift package of seeds packed by you and sent by the British War Relief Society. After a most successful season, I felt I must write you a note of appreciation on the particularly fine quality of your seeds.

The Allotments Association of which I am a member decided to hold a vegetable and fruit show to encourage the members. I am pleased to report that using produce raised entirely from your seeds, I won a splendid trophy presented by Viscount Portal (Chairman, Great Western Railway) for the member winning most points in the show. My firsts included your Onion Yellow Globe Danvers, Beet, Cabbage, Carrot and Peas, besides several seconds."

I must say that the results obtained from these seeds were quite remarkable, particularly as the cultivation of our plots was only a spare time job for us."

## Feed Your Plants Properly With **ES-MIN-EL**

Es-Min-El gets its name from three important words—ES-sential, MIN-eral, EL-ements. It supplies those elements which are normally lacking in the soil. It is not a fertilizer, but a fertilizer supplement.

Es-Min-El is a carefully balanced and easily soluble mixture of the mineral elements needed by fruits, vegetables, flowers and field crops for healthy and profuse growth. They can be no better than the soil in which they are grown—so if needed minerals are missing, crops will fail. Through the application of Es-Min-El this condition can be corrected.

Best results are obtained when Es-Min-El is used in combination with a good commercial fertilizer before planting. Fifty to seventy-five pounds of Es-Min-El spread broadcast will mineralize one acre; one cupful will mineralize a garden plot ten feet square.

Sold in convenient 5- and 100-lb. bags.

**100 lb. bag \$10.60 per bag, 5 lb. bag \$1.25 per bag**

What users of Es-Min-El say about it:

*Phoenix City, Alabama*

... "got the most outstanding and noticeable effects on tomatoes when I used Es-Min-El."

*Crown Point, New York*

*Raleigh, North Carolina*

... "fruits and vegetables taste better."

*Woodsville, New Hampshire*
